CONTENTS

What’s in this guide

A walkthrough of the public GoLyt website for the Kilimanjaro → Zanzibar pilot.

01 Home

02 How it works

03 Services & pricing

04 Book a service

05 Track luggage

06 Customer account

07 Contact, FAQs & tips

Before you start

- Open the GoLyt website in a browser (local default: **http://localhost:5173**).
- You do **not** need a mobile app for the pilot — use this site and your private track link.
- Switch language with **EN / SW** in the top navigation.
- Officers use a separate ops app; operations lead uses the admin console. This guide is for travellers only.

START HERE

1. Home

Brand | Book / Track CTAs

Home is the first viewport of the traveller site: GoLyt branding, the corridor promise, and clear next steps.

- **Book a service** starts a quotation and booking flow.
- **Track luggage** opens status lookup with your bag code and private token.
- The page also previews the four custody steps so you know what happens after booking.

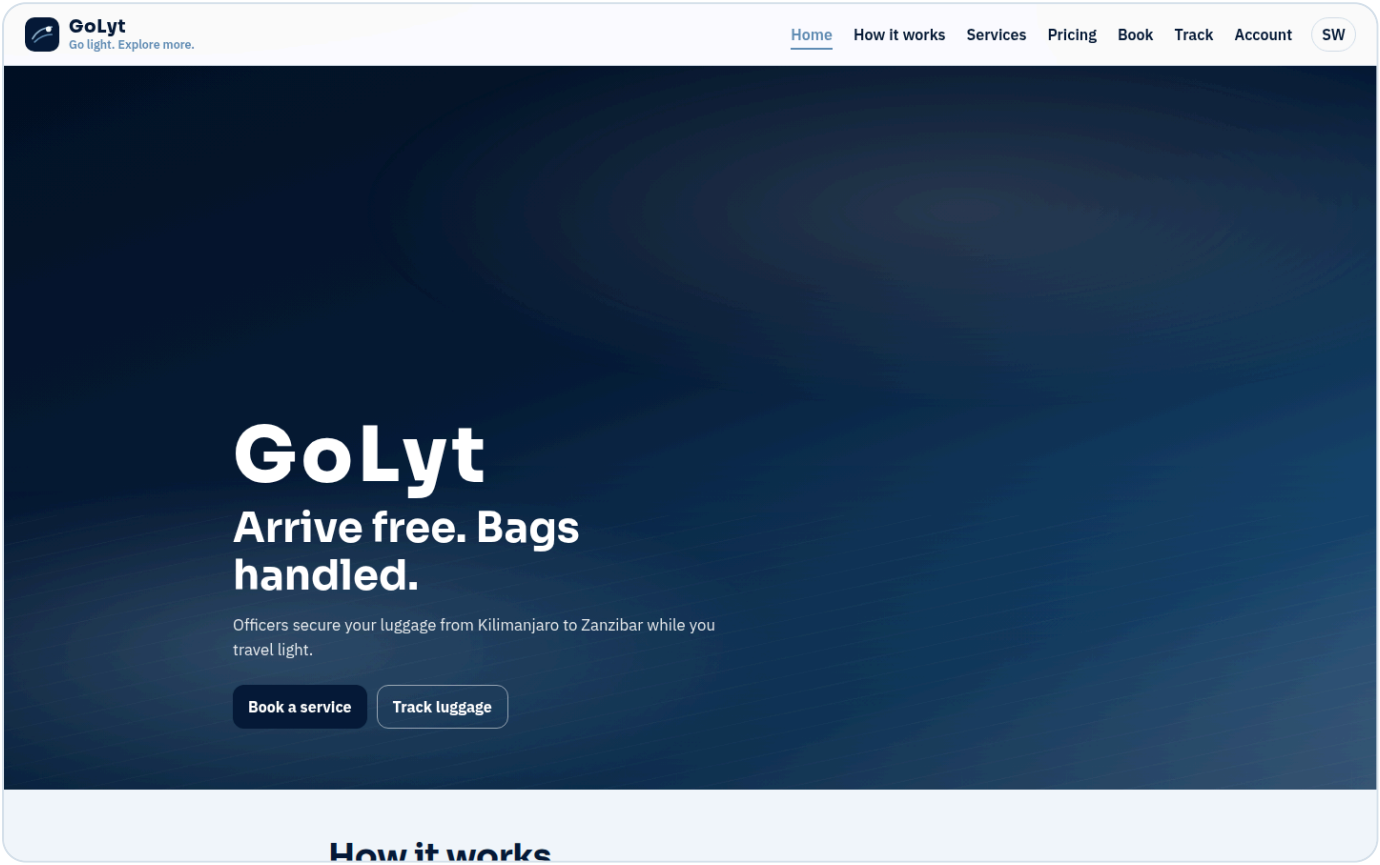

Figure 1 — GoLyt home with Book and Track actions.

UNDERSTAND CUSTODY

2. How it works

Four steps | No GPS

How it works explains sealed custody — status events, not live maps.

1. **Book** — choose a service online or register at KIA intake with an officer.
2. **Secure** — QR label, photos, and seals create a sealed custody record.
3. **Transfer** — manifest handover moves bags toward Zanzibar storage.
4. **Collect** — you get a ready notice, then verified release at the pickup desk.

> Tracking is status-based. Share your private track link only with people who should see bag status.

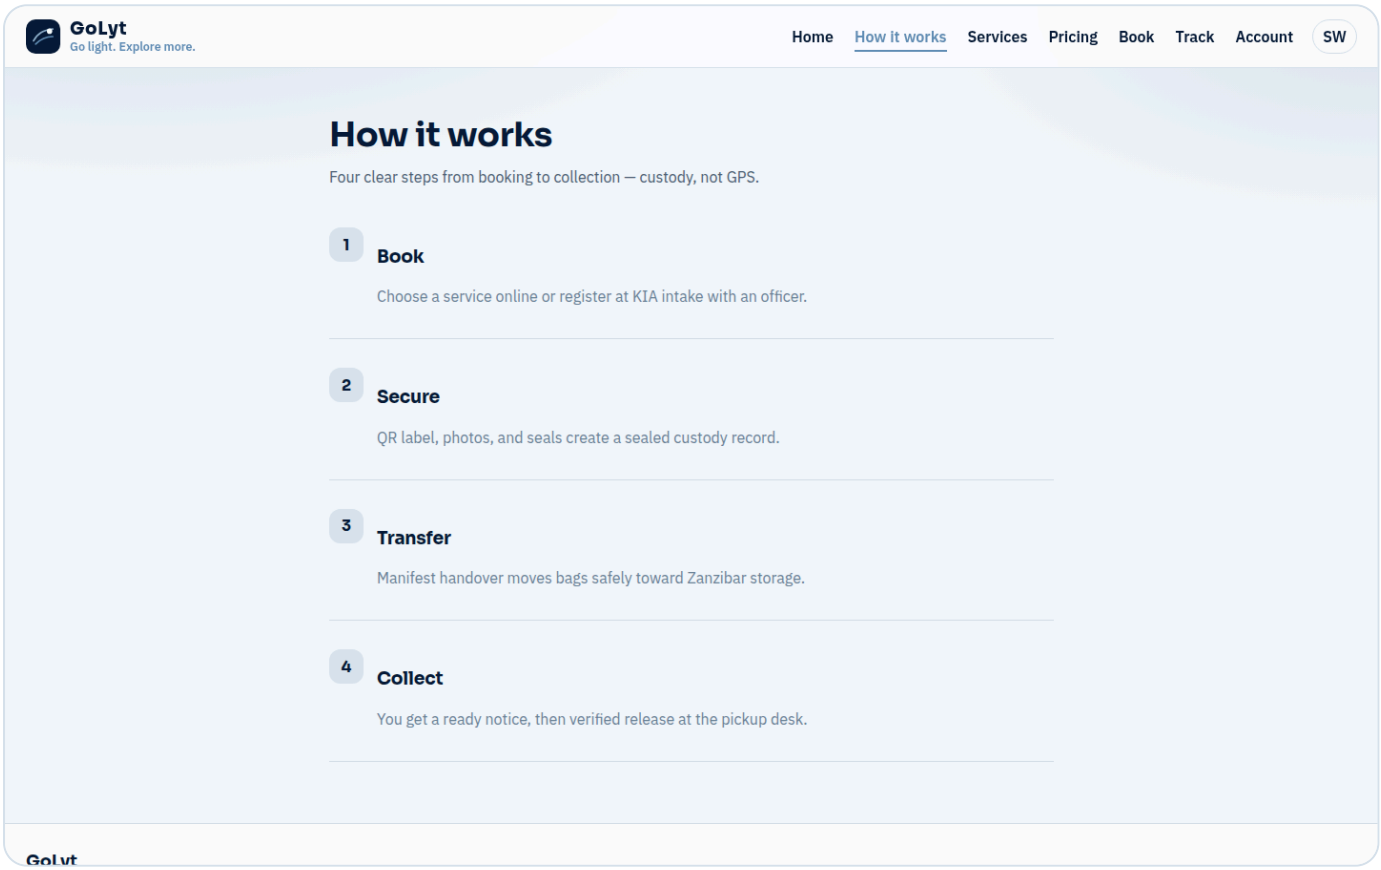

Figure 2 — Four custody steps from booking to collection.

CHOOSE

3. Services & pricing

Catalog | Live amounts

Services lists active offerings for the pilot corridor. **Pricing** shows live catalog amounts before you commit.

- Amounts are typically shown per bag in TZS.
- Your final charge follows the quotation you generate on Book.
- Mobile money and card checkout continue to roll out; the site may show a payment scaffold while providers go live.

CORE JOURNEY

4. Book a service

Quote | Travel details | Account

Book is where travellers create a quotation and convert it into a booking.

1. Select a **service** and number of **bags**, then choose **Get quote**.
2. Review the quote amount and expiry.
3. Sign in under **Account** if you have not already — converting a quote requires a customer account.
4. Enter travel details (arrival flight, KIA date, Zanzibar date/flight, hotel, notes).
5. Choose **Create booking**. Payment initiation may appear as a later-phase checkout step.

> Guests can request a quote without signing in. Creating the booking needs a registered customer account.

STATUS

5. Track luggage

Private token **Timeline** **Pickup**

Track luggage shows sealed-custody status using the bag code and private token from your GoLyt message or officer.

- Enter **Bag code** and **Tracking token**, then **Show status**.
- Review the custody timeline (received, sealed, airline handover, Zanzibar storage, ready, released).
- Pickup name, place, hours, and phone appear when available.
- **Open printable track page** opens a shareable/print-friendly track view in a new tab.

YOUR PROFILE

6. Customer account

Register / Sign in **Bookings** **Support**

Account is the traveller portal for identity, bookings, and support tickets.

- **Register** with full name, phone, nationality, passport, email, and password.
- **Sign in** to see your profile, open bookings, and receipt summary details.
- Cancel an **OPEN** booking when needed.
- Open a **support ticket** from Account (signed-in messages are tracked against your profile).

> Customer accounts are separate from officer and admin staff accounts. Use the website Account page — not the ops console.

HELP

7. Contact, FAQs & tips

Desk FAQs

Contact lists desk details and a message form. **FAQs** answers common pilot questions.

- No traveller mobile app is required for the pilot.
- Bags move KIA intake → sealed custody → airline handover → Zanzibar storage → collection.
- There is no live GPS — tracking is custody status only.
- Collection requires the named traveller with ID verification at the pickup desk.

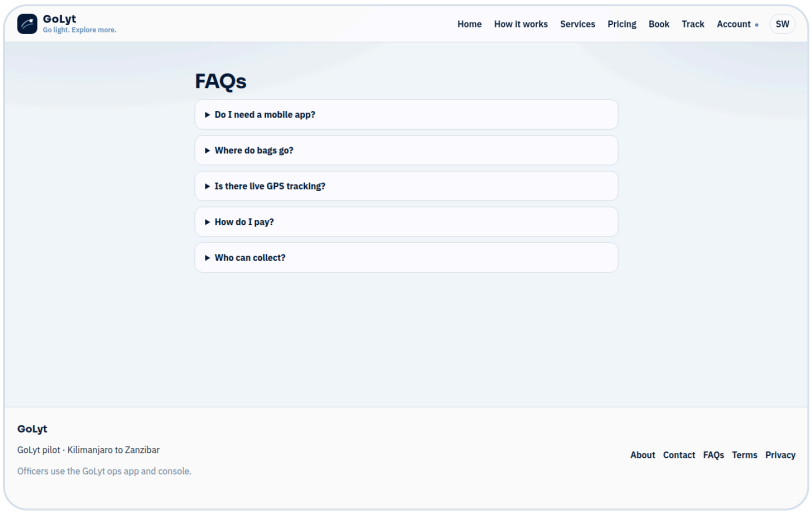

Figure 9 — FAQs for the pilot corridor.

Quick tips

- Keep your track token private.
- Bring matching ID to the Zanzibar desk.
- Confirm pickup hours on your track link.
- Use EN/SW anytime from the header.

Need help?

Use Contact or open a support ticket from Account when signed in.
